|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Interpreting Arc and Line Shapes in the Fault Ruptures of the 2016 Mw7.8 Kaikoura, New Zealand and the 2023 Mw7.8 and Mw7.6 East Anatolian Fault, Turkey-Syria Earthquakes: A Theoretical Approach</b> | 679 |
| Mudrik Rahmawan Daryono, Gino de Gelder & Adi Patria                                                                                                                                                      |     |
| <b>Properties of Hydrochar Derived from Arabica Coffee Agro-Industry Residues under Wet Torrefaction Method</b>                                                                                           | 692 |
| Nyakty Shalihah, Adi Setiawan, Muhammad Muhammad & Shafira Riskina                                                                                                                                        |     |
| <b>Experimental Investigation of Ammonia/Oxygen/Argon Combustion: The Role of Equivalence Ratio and Nozzle Shape in a Constant Volume Combustion Chamber with Sub-chamber</b>                             | 704 |
| Mitsuhisa Ichiyanagi, Emir Yilmaz, Takuma Ohashi, Masato Sanno, Guansen Lin, Sebastian Gunawan, Henry Widjaja, Leon Jonathan, Gabriel Jeremy Gotama, Willyanto Anggono & Takashi Suzuki                   |     |
| <b>Evaluation of Mechanical Properties of Warm-Mix Asphalt Mixtures Prepared with Sasobit and Zeolite Additives</b>                                                                                       | 716 |
| Wshyar M. Hasan, Rana A. Yousif, Saeid Hesami, Sady A. Tayh, Abbas F. Jasim & Hawkar H. Ibrahim                                                                                                           |     |
| <b>Biosynthesis and Antibiofilm Activity of Zinc Oxide Nanoparticles</b>                                                                                                                                  | 727 |
| Vita Wonoputri, Tjokorde Walmiki Samadhi, Shafira Khairunnisa & Eka Rahayu                                                                                                                                |     |
| <b>Optimization of Ultrasonic and Microbubble Disinfection for Escherichia coli and Staphylococcus aureus: Experimental Design and Effectiveness Evaluation</b>                                           | 742 |
| Siwasit Pitjamit, Norrapon Vichiansan, Komgrit Leksakul & Dheerawan Boonyawan                                                                                                                             |     |
| <b>Fatigue Evaluation of Steel Truss Arch Bridge Based on Traffic Load Simulation Using Weigh-in-Motion Data: Case Study of Rumpiang Bridge</b>                                                           | 756 |
| Rio Pramana & Ivan Sandi Darma                                                                                                                                                                            |     |
| <b>Utilization of Syngas as Co-firing Fuel for Carbonization of Arabica Coffee Pulp</b>                                                                                                                   | 771 |
| Rizqon Hasibuan, Adi Setiawan & Faisal Faisal                                                                                                                                                             |     |
| <b>Improved Risk Assessment of TBM Tunneling Collapse Based on Nonlinear-Cloud Model</b>                                                                                                                  | 781 |
| Longjiang Wang, Tian Xu, Dachao Zong, Qiang Han, Yongjin Zhao, Zhanping Song & Yongli Zhang                                                                                                               |     |
| <b>Comparative Seismic Evaluation of Building Codes: A Case Study on Structural Performance and Safety</b>                                                                                                | 793 |
| Jovan Thierry Salim & Indra Djati Sidi                                                                                                                                                                    |     |
